Things Done Well

ANU Supervisor

Alley is doing her internship with ESRI Australia, and is working with another ANU Student Paris Capell. My comments are the same for both students (please see feedback on Paris' intership). From what I can see Alley is doing well in her internship

Student

'-Project proposal -Problem solving -Finding information -Researching methods and procedures

Host Supervisor

Alannah, despite being initially overwhelmed with the level of freedom given for the project has done an excellent job in setting a solid project framework and produced a high quality output

Things to be Improved

ANU Supervisor

None -from what I know, Alley is working well with her ESRI project

Student

'-Communicating with supervisors -Providing progress reports

Host Supervisor

I would have liked to see Alannah reach out earlier on for assistance as needed.

'-I have only met with my supervisors (host and academic) once. They are hard to tie down. Usually I consult other staff for help. -Project was quite disorganised at the beginning. My supervisors guided me in one direction, but then I was introduced to another person who I was actually producing work for and had to change my project proposal extensively in week 5 because it was not what they wanted. Perhaps they should have been listed as a supervisor?
